EXECUTIVE SUMMARY

UX/UI Designer with experience designing complex B2B platforms. Front-end development background (SaaS, fintech) enables strong design-to-development collaboration and technically feasible UX decisions. Skilled in end-to-end product design and cross-functional teamwork.

Moving towards Design Engineering. Seeking opportunities in dev tools, SaaS, creative tech, or design systems—where design meets code.

Core Skills

Design: UX/UI, User flows, Prototyping, Responsive design, Design systems, Web design

Research: Benchmarking, User feedback, CJM

Development: HTML/CSS/JS, Git, Developer handoff

Tools: Figma, Miro, Jira, Webflow, VSCode

PROFESSIONAL EXPERIENCE

Codexplore Remote

UX/UI Designer

April, 2025 – Present

Responsibilities

- Lead end-to-end UX/UI design for a B2B distribution platform across web and mobile.
- Own UX and UI delivery for 10+ product modules, including inventory, orders, partners, logistics, sales, employee management, and related admin tools.
- Collaborate with a 10-person cross-functional team (developers, analysts, project managers)

Key Achievements

- Designed an end-to-end order creation flow to streamline distributor-to-store transactions
- Set design systems and delivery workflows, improving consistency and team throughput.
- Conducted competitive benchmarking and user feedback sessions to inform design decisions and product direction.

Freelance (Self-employed) Kazakhstan, Almaty

UX/UI/Web designer

July, 2024 – March, 2025

Responsibilities

- Designed websites for construction, education, media, e-commerce, and crypto clients.
- Led projects from discovery to delivery, working with startups and established companies.
- Created designs ranging from portfolios to multi-page corporate websites.

Key Achievements

- Built repeatable discovery workflow to align stakeholders, clarify scope, and reduce rework.
- Managed multiple projects in parallel while maintaining quality and clear communication.

Finenex

Kazakhstan, Almaty

UX/UI designer

July, 2023 – May, 2024

Responsibilities

- Developed front-end for SaaS, fintech, and banking products.
- Built merchant portals, and banking interfaces (loans, deposits, transfers) with API integration.
- Delivered features in teams of 10+ using JavaScript and React.js.

Key Achievements

- Grew from junior to middle developer working across different products and teams.
- Learned web standards, application architecture, and development processes from planning to release.

Various Companies - (SaaS, Fintech & Banking) Kazakhstan, Almaty

Front-End Developer

July, 2019 – May, 2023

Responsibilities

- Developed front-end features for SaaS platforms, fintech payments, and digital banking products.
- Built merchant portals, payment forms, and banking interfaces (credit, deposits, transfers), working with APIs and back-end integration.
- Delivered features in large teams using JavaScript and modern development tooling, supporting stable releases and iterative improvements.

Key Achievements

- Developed strong understanding of technical constraints, enabling higher-quality UX decisions, faster handoff, and smoother implementation collaboration.
